### SECTION B.

In quite a number of cases, the entries in this book are not from the original papers, which were not attainable except at the sacrifice of much time and research. In these cases, the earliest attainable registers are used, which give the masters and owners for the time being, who might not have been the original ones. Below are given the names of such vessels, the date preceding each name being the year in which the vessel was built, and the following date being that of the papers used in this connection.

### SECTION C.

The District of Bath, as at present constituted, comprises those ports which are situated on the Kennebec river. Harpswell and a part of Brunswick are now in the Portland District. Bath was formerly a part of Georgetown, and was incorporated 1781. Richmond was set off from Bowdoinham 1823. Bowdoinham was incorporated 1762. Pittston was incorporated 1779, and formerly embraced Gardiner. Hallowell was incorporated 1771, and formerly included Augusta, Chelsea, and a part of Farmingdale. Phippsburg was incorporated 1814. Topsham was incorporated 1764. Georgetown was incorporated 1716, and formerly included Phippsburg, Bath, Woolwich and Arrowsic. Gardiner was set off from Pittston 1803. Farmingdale was set off from Hallowell, Gardiner and West Gardiner in 1852. Augusta was incorporated in 1797. Woolwich was incorporated 1759. Vassalboro was incorporated 1771. Dres-

den was formerly part of Pownalboro, and incorporated 1794. Waterville was formerly part of Winslow, and incorporated 1802. Arrowsic was set off from Georgetown in 1841. Winslow was incorporated in 1771. Pownalboro has passed out of corporate existence. Sidney was set off from Vassalboro in 1792. West Bath was set off from Bath 1844. Perkins was set off from Dresden 1847. Chelsea was set off from Hallowell 1850.

The foregoing data are deemed of importance in connection with this work. The vessels built in the respective towns are credited to them according to their corporate limits at the date of construction, the present lines of territory not being taken into account.

#### SECTION D.

##### Concluding Remarks, in lieu of a Preface.

It is not claimed that this work is absolutely accurate. The first edition of a work of this nature is not very likely to be so. From the nature of the subject matter, and the circumstances attendant on a research among old documents, it would be almost miraculous if errors of omission and commission should not occur. But we claim that it is substantially correct; sufficiently so as to be assigned a place among works of a statistical character. The task of preparing it for the press has been carried on by the editor, while attending to the routine business of a weekly newspaper and job office. A large proportion of the labor has necessarily been performed during hours which should have been devoted to rest. But if the result is measurably acceptable to those generally supposed to be interested in maritime statistics, and is found to be free from glaring errors or discrepancies, we shall feel that our efforts have not been in vain, and that this little pamphlet may form a tolerably safe basis for a more extended work, to be undertaken at some future time, when leisure hours may be more plentiful.
